Year Established	1986
Paid Up Capital	US\$42 Million
Bankers	Bank of Tokyo-Mitsubishi UFJ Ltd Mizuho Bank Ltd
Staff Strength	1068 +/-
Key Personnel	President Director Jun Miyazaki Director Eddy Sutanto Plant Director Tetsu Honjo

## Nature of Business

A Fully Integrated Production Complex.

Three interdependent plants at ASC's 90-hectare Cilegon complex are operated by a Distributed Control System which ensures production efficiency while maintaining high environmental standards and ensuring safety.

In the first process, Caustic Soda is manufactured. Derivative products include Chlorine Gas, Hydrogen, Hydrochloric Acid Solution and Sodium Hypochlorite Solution.

The second process produces Vinyl Chloride Monomer as a raw material for use in PVC production. Chlorine Gas generated in the Chlor-Alkali plant is reacted with Ethylene to produce Ethylene Dichloride, which is then further cracked into VCM.

The output of the complex' third process is Polyvinyl Chloride.

In this stage, VCM is polimerized into PVC.

---

## Main Shareholders/Parent Company

Joint Venture of AGC (Asahi Glass Co. Ltd, Japan), PT Rodamas (Indonesia), Ableman Finance (British) and Mitsubishi Corporation (Japan)
