## **Quality Policy**

The satisfaction of customers comes first. We will use new technologies and practice technical skills to obtain customer's satisfaction. We will deliver only the products that satisfy our customers.

## **Environment Policy**

Strictly respect the environment laws and regulations of the communities and countries involved. Always aware of environment impact from our activities, we will improve our processes for better environment.

- Reduce waste and garbage, encourage and promote company-wide energy and resource saving.
- Promote and encourage all employees and relevant parties to understand their roles and responsibilities toward environment management system.
- Develop and adjust to harmonize with local society. Continue to improve environment management system in order to reduce environment impacts.
- Establish environment management objective and target. Set up a plan to implement and follow up. Once the target has been achieved, the new challenge target shall be allocated for better improvement.

## **Information Security Policy**

We shall secure: Customer's confidential information, Personnel privacy information and Our business know-how, technology and other confidential information

Object to be aware:

1. Confidential information leakage from unauthorized access with dishonest purpose
2. Confidential information leakage from careless physical methods
3. Employee and relevant personnel's malpractice
4. Other issues from normal business operation related to information security

Implement Policies:

1. We will not use or employ a person or organization which has dishonest history or can make risks to information security.
2. We will not breach our promises and commitments to secure our own or our customer's confidential information.
3. We create an environment to protect information assets and to prevent employee's malpractice.
4. We respect relevant laws and regulations and follow strictly.

## Executive Summary

Auto CS Engineering believes it has an important duty to ensure good environmental performance in all its business operations and to provide the necessary organization, commitment and training to fulfil this obligation. The top management firmly believes in, and is committed to monitoring and improving environmental performance, pollution prevention and environment protection.

### These aims will be achieved through:

- Comply with applicable legal requirements and other requirements to which the company subscribes which relate to its environment aspects.
- To include the consideration of environmental issues in all business strategies and initiatives
- Auto CS Engineering management are committed to ensure that protection of the environment is firmly embedded in both the company's and all employees culture and will endeavor to influence its suppliers and customers in a similar strategic environmental manner. The company shall investigate the feasibility of influencing its suppliers, customers and third parties with consideration to life cycle impacts of their aspects and activities
- Prevent pollution, reduce waste and minimize the consumption of resources.
- Consider the wider global impact of all our activities including those of our suppliers customers and other stakeholders
- Educate, train and motivate employees to carry out tasks in an environmentally responsible manner and ensure that a continuous professional development strategy remains core to our business goals
- Encourage environmental protection among suppliers and subcontractors.
- Encourage and enhance biodiversity and ecology

All employees have responsibilities for policy implementation by participating and contributing to its success through their actions and suggestions.
